PUBLISHED MONTHLY, WITH TWO ISSUES DURING DECEMBER, AT PRINCE AND LEMON STREETS, LANCASTER, PENNSYLVANIA
BY THE AMERICAN PSYCHOLOGICAL ASSOCIATION, INCORPORATED

Entered as second-class matter July 12, 1937, at the post-office at Lancaster, Pa., under the Act of March 3, 1879

Acceptance for mailing at the special rate of postage provided for in the Act of February 28, 1925, embodied in paragraph 4, Section 538, P. L. and R., authorized October 24, 1947.

MEMBERSHIP RULES IN THE AMERICAN PSYCHOLOGICAL ASSOCIATION

There are three classes of membership in the American Psychological Association: Associate, Fellow, and Life Member.

Associates

The largest class of membership is *Associate*. In order to qualify as an Associate an applicant must meet one of three sets of requirements:

1. He must have a doctor's degree based in part upon a psychological dissertation and conferred by a graduate school of recognized standing; *or*
2. He must have completed two years of graduate work in psychology at a recognized graduate school and be devoting full time to work or graduate study that is primarily psychological in character; *or*
3. He must have completed one year of graduate study plus one year of professional work in psychology and be devoting full time to work or graduate study that is primarily psychological in character.

Distinguished persons in related sciences, education, or other fields outside of psychology sometimes apply for membership in the Association because of their interest in allied research problems. When the Board of Directors considers it in the interests of the Association to elect such distinguished persons, the requirements stated above may be waived.

Annual dues for Associates are now \$12.50.

Applicants must have their applications complete by September 15. New Associates are elected in the fall and their membership is dated as of the next year. Journals due Associates begin with the January issues; they receive the *American Psychologist*, the *Psychological Abstracts*, the *Psychological Bulletin*, and the *Directory*.

Fellows

Properly qualified Associate members may, upon nomination by one of the Divisions and election by the Council of Representatives, become *Fellows* of the American Psychological Association. Fellows must previously have been Associates. They must have a doctor's degree and at least five years of acceptable professional experience beyond that degree. They must be primarily engaged in the advancement of psychology as a science and a profession.

Annual dues for Fellows are now \$17.50. Fellows receive the same journals as Associates.

In the American Psychological Association, no one is made a Fellow except at his own request.

Life Members

Life Membership is open to members who have reached the age of 65 and who have been members for twenty years. They are exempt from dues, and receive the *American Psychologist* and the *Directory*.

LIST OF JOURNALS REGULARLY SEARCHED

So that users of PSYCHOLOGICAL ABSTRACTS may know the extent of our coverage, we publish below the third annual list of journals which are regularly searched. This list, revised by the deletion of journals which it is no longer possible to cover regularly and by the addition of other journals, totals 519, an increase in 22 titles over Volume 22. The searching categories are indicated by type face: **bold face**, journals received by the editorial office; roman, journals searched by the abstractor; *italics*, journals searched by title only. The list is correct as of 1 November 1949. In those cases where no abstractor is indicated, the journal is temporarily unassigned.

PSYCHOLOGY

Henry E. Garrett, Professor of
Psychology, Columbia University

*Is
psychology
helping
your
students
to solve
their
everyday
problems?*

Employing a functional approach, this outstanding new book helps students to meet problems of everyday living, such as studying effectively, getting a job, and understanding himself and others. Less technical in the old-fashioned sense than the usual type of psychology text, it nevertheless covers all the essential information required in a beginning course in psychology.

These important aids to learning are at the ends of chapters:

- Experiments for the student to make
- Topics for the student to think about and discuss
- Reading references about which the student is told what to expect

ABSTRACTS OF HUMAN BIOLOGY

A sectional edition of *Biological Abstracts* designed particularly
for psychologists and related fields

Section H—Abstracts of Human Biology—includes Human Heredity; Population; Anatomy and Embryology; Child Development; Adolescence; Growth; Nutritional Disorders; Food Habits and Appetites, Malnutrition; Senescence; Endocrine Bases of Personality and Behavior; Reproduction and Sex; Human Ecology; Race; Health Factors Affecting Population and Human Adaptation; and kindred topics.

Section H does not compete with, or duplicate, any existing abstract services. Rather, it supplements these services by abstracting, from the biological point of view, the biological literature paralleling and directly applicable to that published in the psychological, neurological, sociological and anthropological journals.

Established in January, 1946, to meet the requirements in Psychology and related fields, Section H is priced at only \$6.50 (Foreign \$7.00). Write for full details and sample copy.
